

Store Manager User Guide

QtrShoe Delivery App

1. Overview

The Overview page provides a daily operational summary of store activity. It helps you monitor order progress, delivery performance, system health, and overall workload.

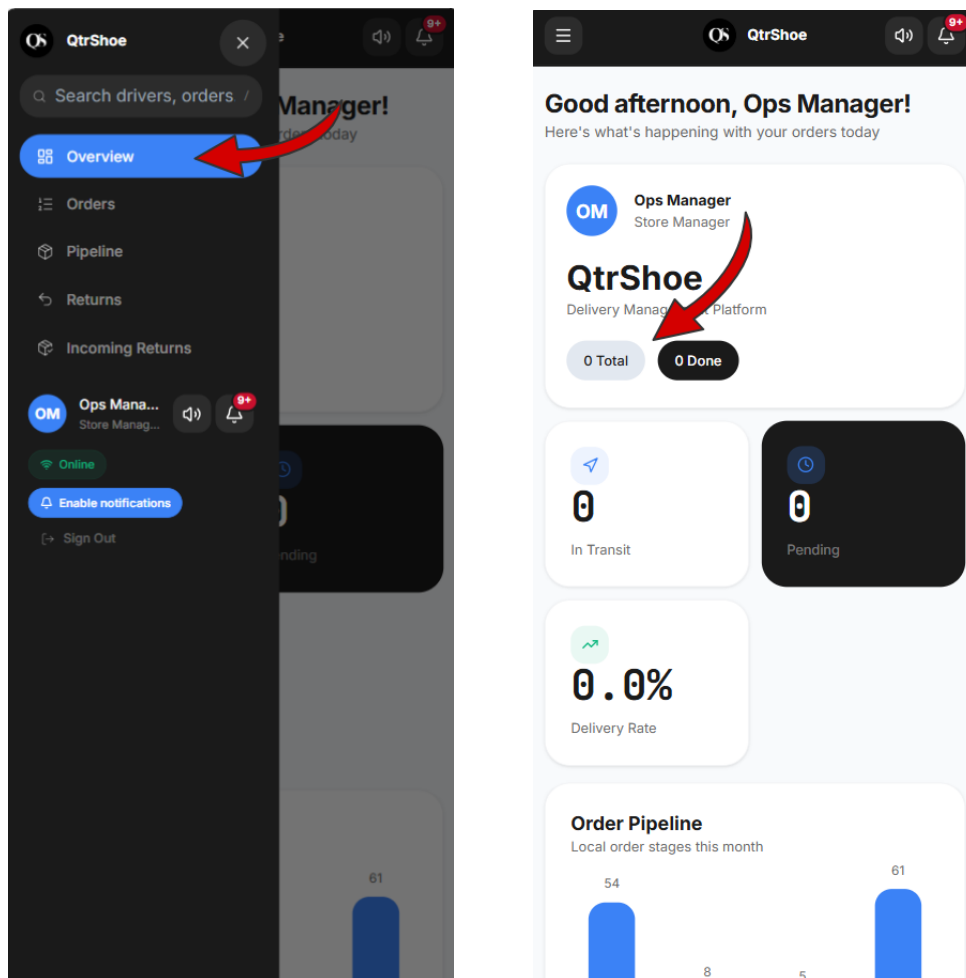

Dashboard Summary

Total Orders

- Total number of orders created today.
- Clicking this card opens the Pipeline section.

Done

- Orders successfully completed.

In Transit

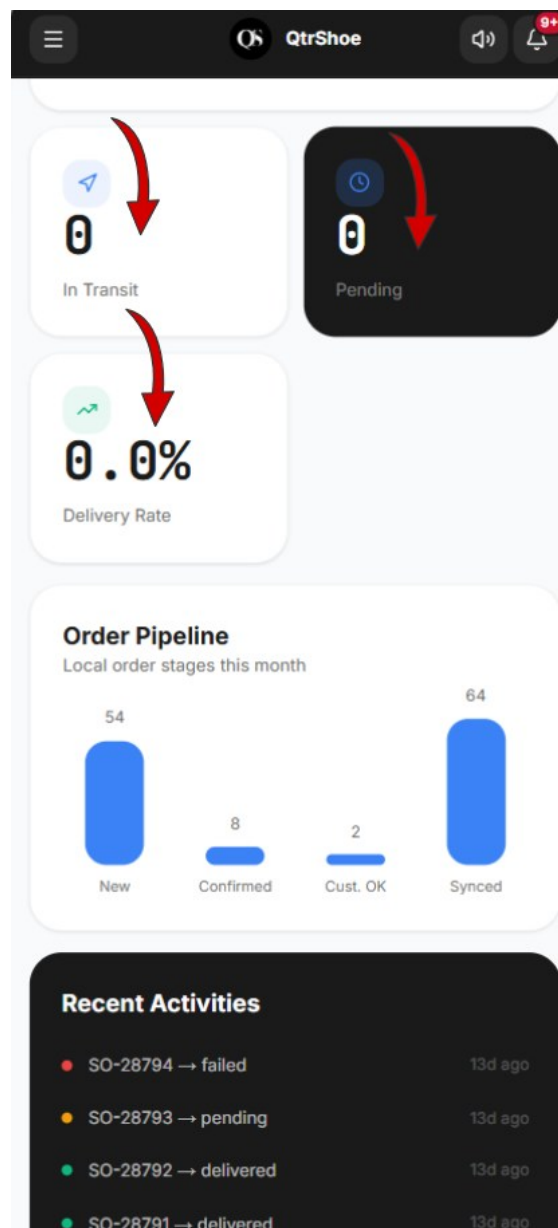

- Orders currently being delivered.
- Clicking this card opens Pipeline filtered to In Transit.

Pending

- Orders awaiting action.
- Clicking this card opens Pipeline filtered to Pending.

Delivery Rate

- Percentage of successfully completed deliveries.

Order Pipeline Chart

Displays monthly order progression through operational stages:

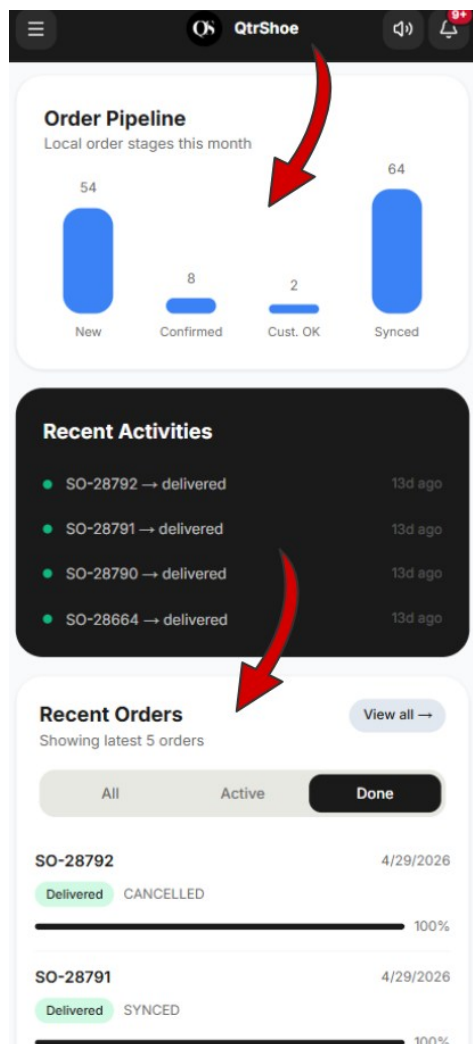

- New
- Confirmed
- Customer Confirmed
- Synced

Use this chart to track processing performance over time.

Recent Orders

Displays the latest 5 orders. Tabs:

- All
- Active
- Done

WhatsApp (24h)

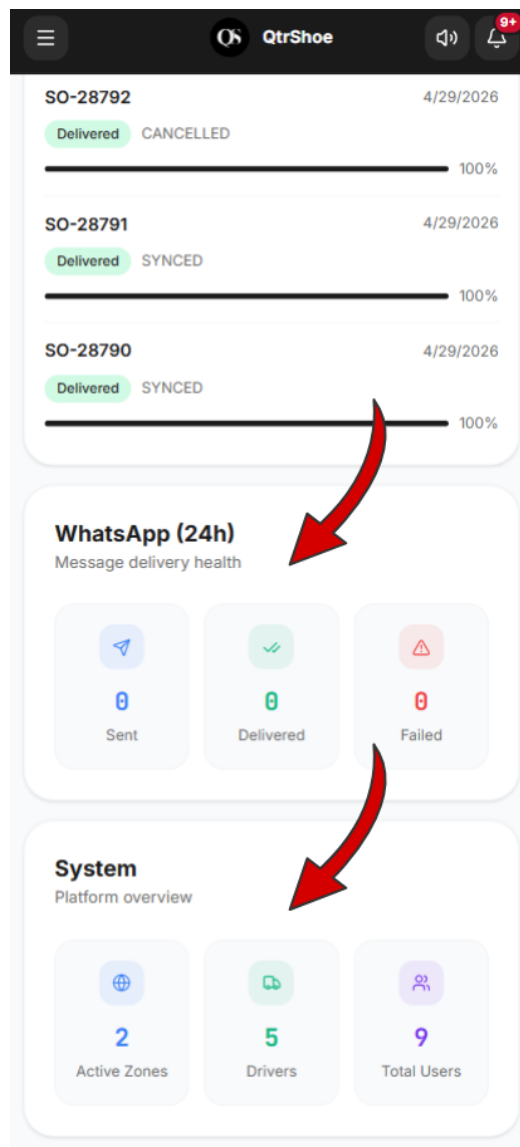

Monitors messaging performance over the last 24 hours. Metrics:

- Sent
- Delivered
- Failed

System Overview

Displays platform status indicators:

- Active Zones
- Drivers
- Total Users

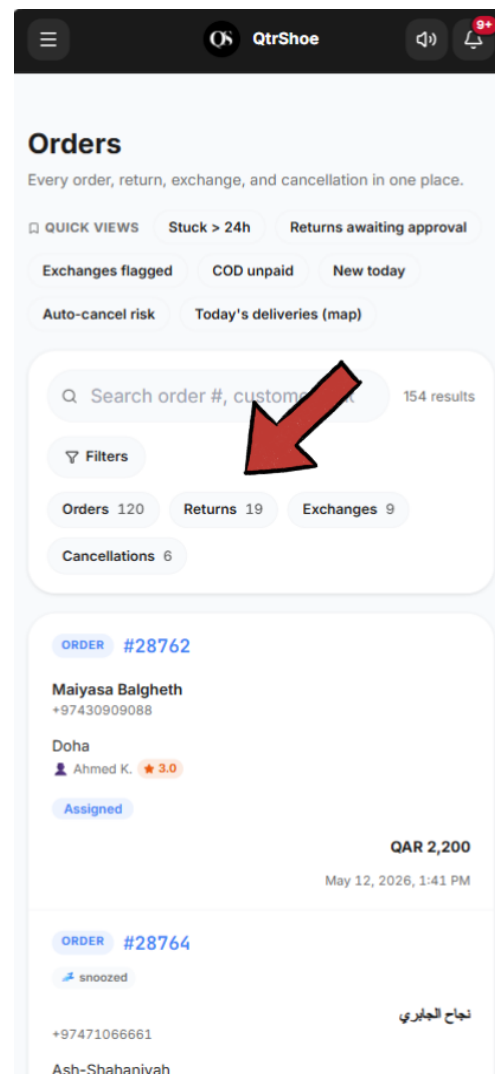

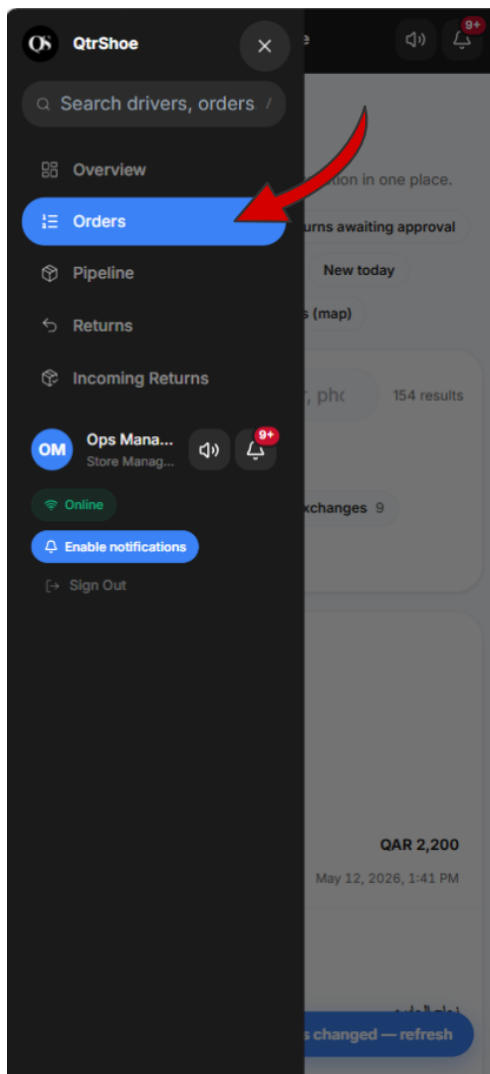

3. Orders Section

A centralized operational monitoring screen used for:

- Searching
- Filtering
- Reviewing all orders
- Monitoring operational exceptions

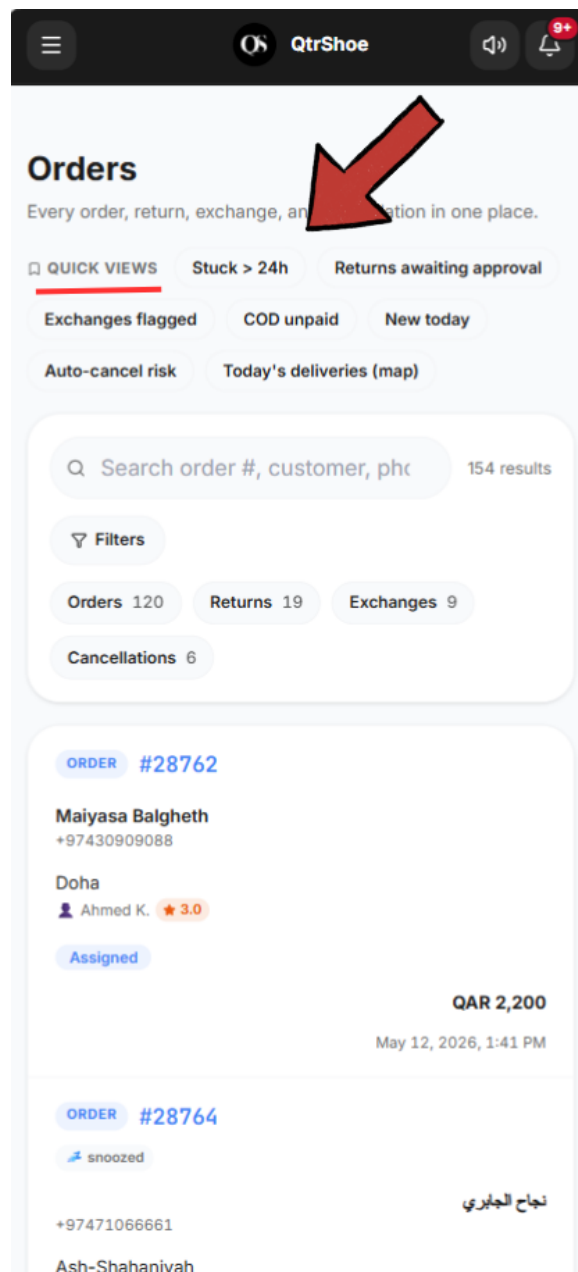

Main Tabs

- **Orders:** All delivery orders
- **Returns:** Return requests
- **Exchanges:** Exchange orders
- **Cancellations:** Cancelled orders

Quick Views (Shortcuts)

- **Stuck >24h:** Orders with no progress for 24+ hours
- **Returns awaiting approval:** Pending return approvals
- **Exchanges flagged:** Exchange requests needing review
- **COD unpaid:** Cash-on-delivery orders pending settlement (COD = Cash on Delivery)
- **New today:** Orders created today
- **Auto-cancel risk:** Orders nearing cancellation due to inactivity
- **Today's deliveries (map):** Live geographic delivery view
- Search

Filters

Delivery Status (examples):

- Pending
- Assigned
- Picked Up
- In Transit
- Delivered

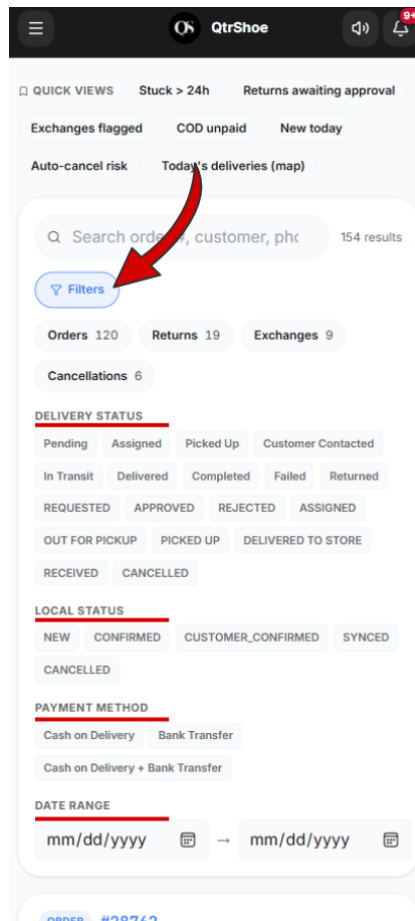

Local Status

- Internal processing stage.

Payment Method

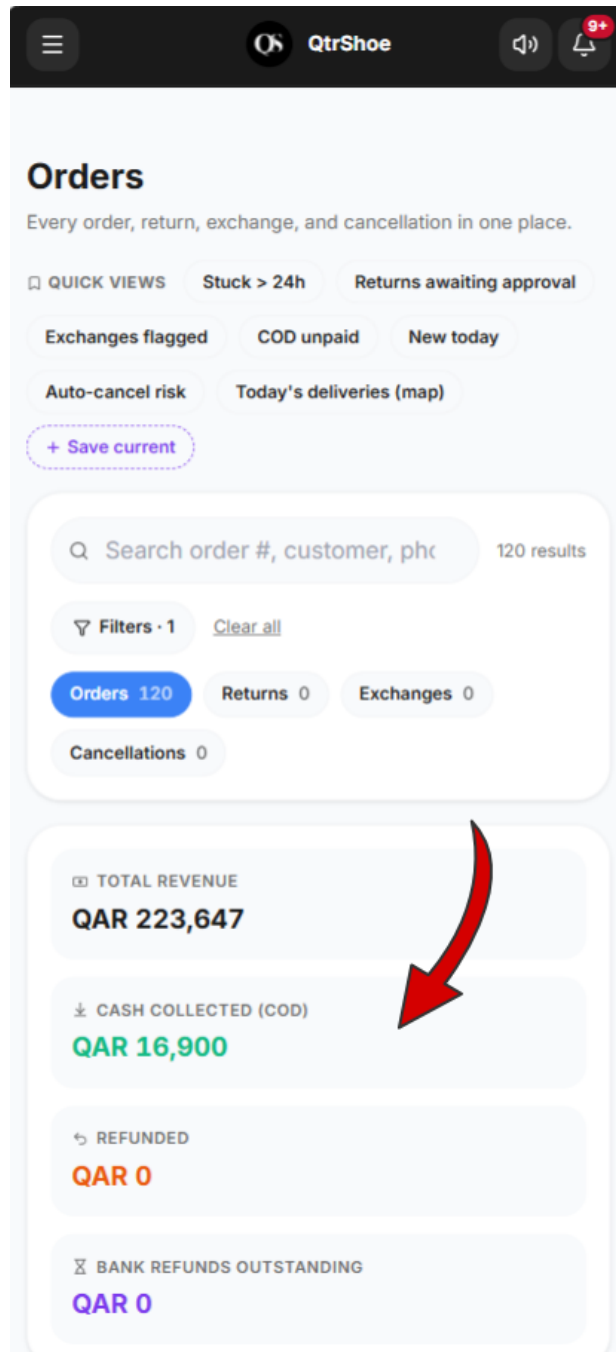

- Cash on Delivery
- Bank Transfer
- Split Payment

Date Range: Custom period filtering.

when you click any Quick View, apply any Filter, or make any selection that changes the displayed results, the following four KPIs will update accordingly based on the current results:

- **Total Revenue**
- **Cash Collected (COD)**
- **Refunded**
- **Bank Refunds Outstanding**

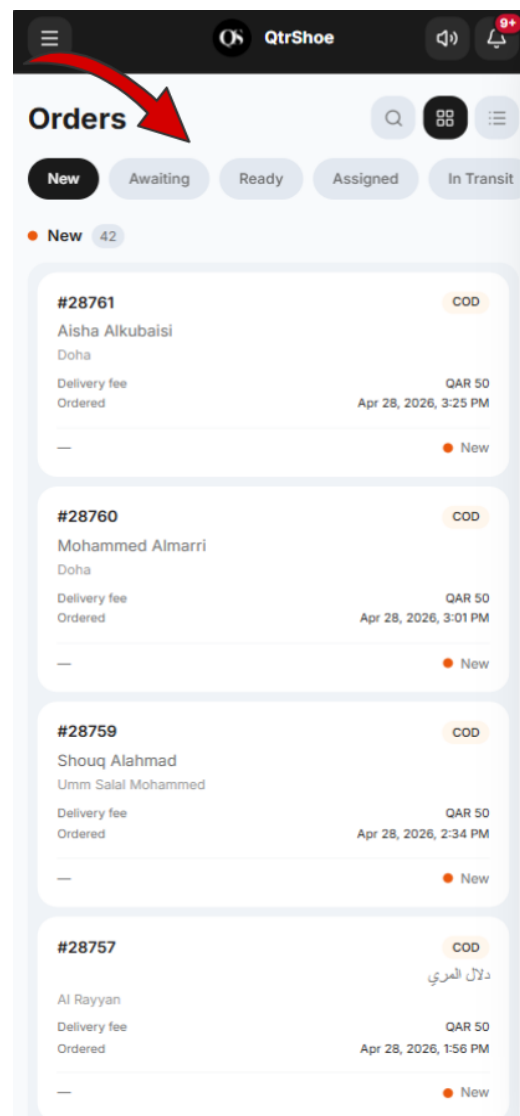

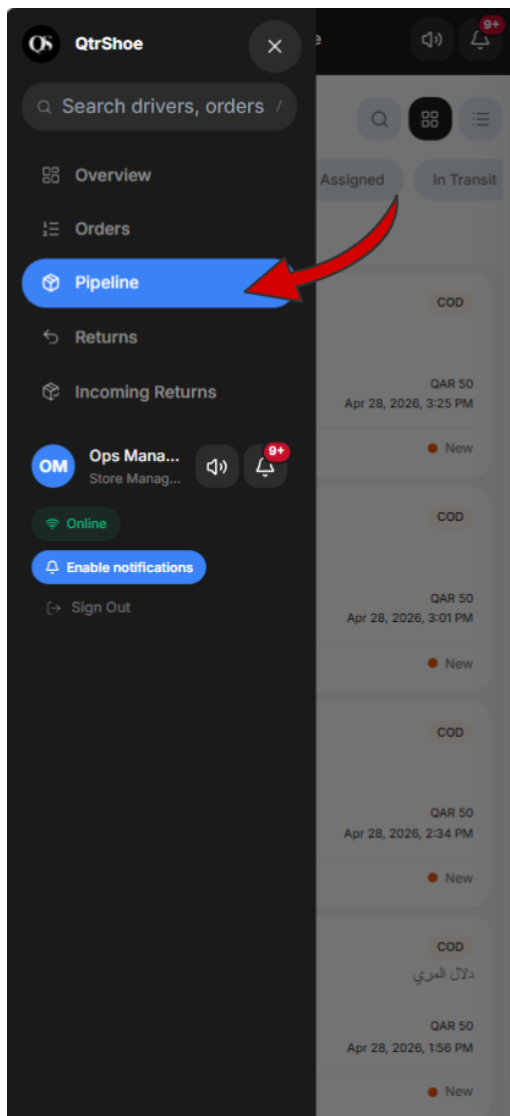

2. Pipeline

The **Pipeline** manages order progression from creation to completion.

Statuses

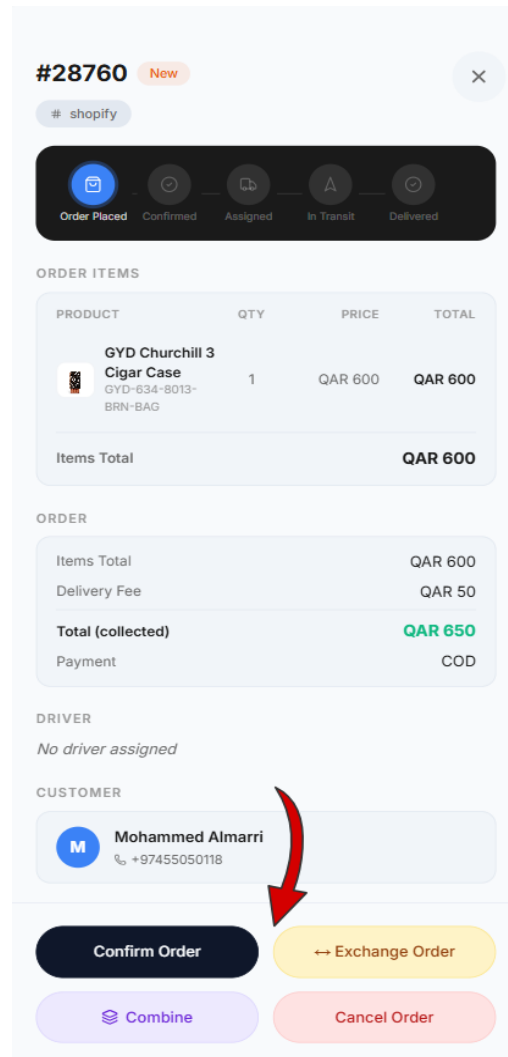

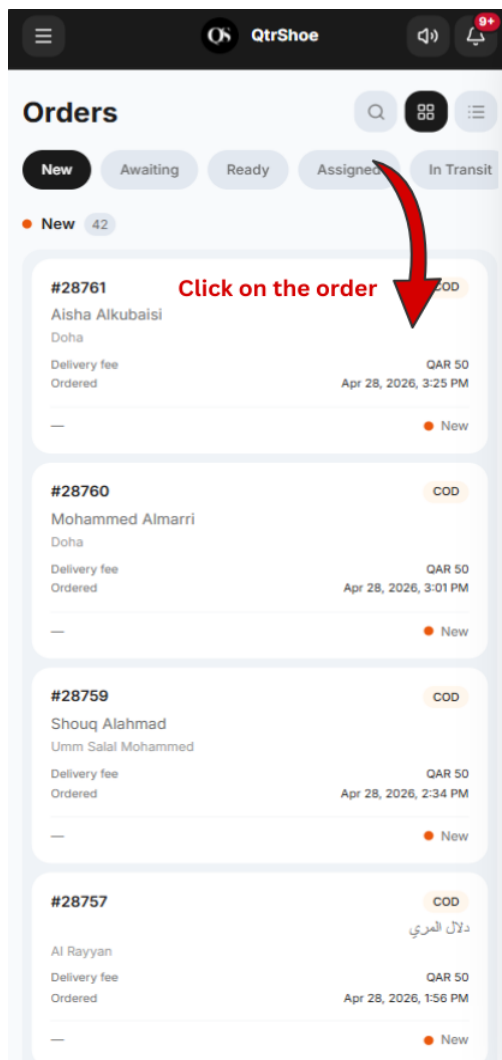

- New
- Awaiting
- Ready
- Assigned
- In Transit
- Cancel Review
- Done
- Cancelled

New: Newly received customer orders.

Available actions:

1. Confirm Order: Approves the order for processing
2. Exchange Order: Marks the order as an exchange request
Important: An exchange can only be initiated if the customer requested it within the last 14 days.
3. Combine: Combines this order with another order
Important: You can only combine (pair) this order with another order for the same customer that is currently in any of the first four Pipeline stages. Once combined, both orders will be delivered together with one delivery fee.
4. Cancel Order: Cancels the order

Awaiting

Orders waiting for customer location confirmation.

Available actions:

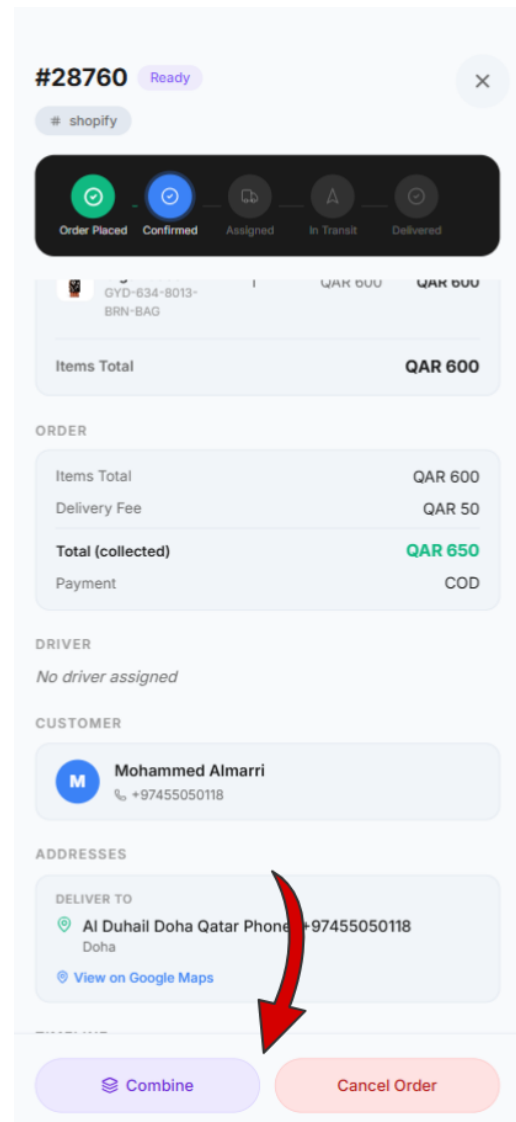

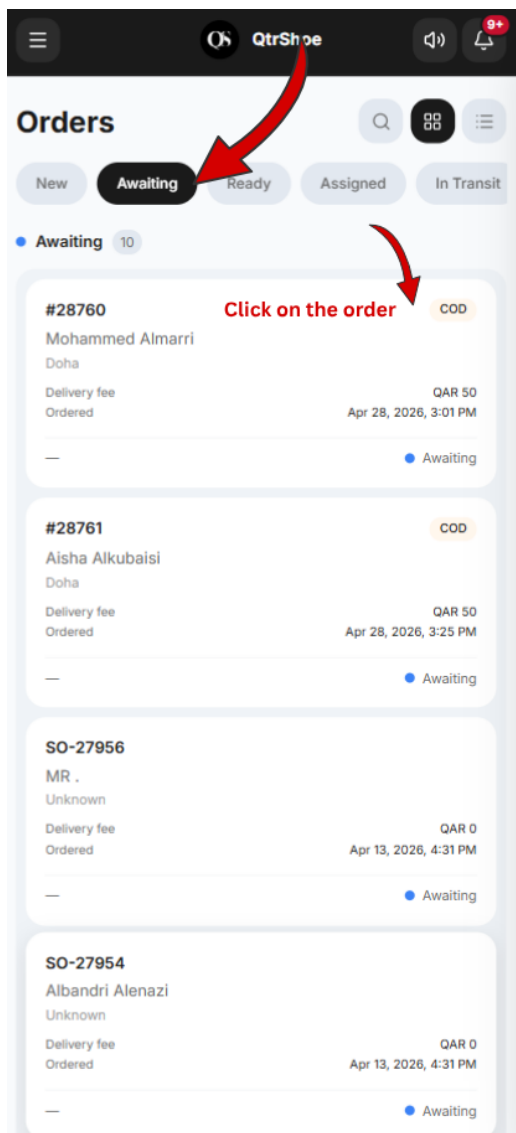

- Combine
- Cancel Order

Customer Confirmation (Automation)

The customer receives a Location Confirmation Message.

After confirmation, the order progresses to the next stage.

If not confirmed within 48 hours, the order may be automatically cancelled.

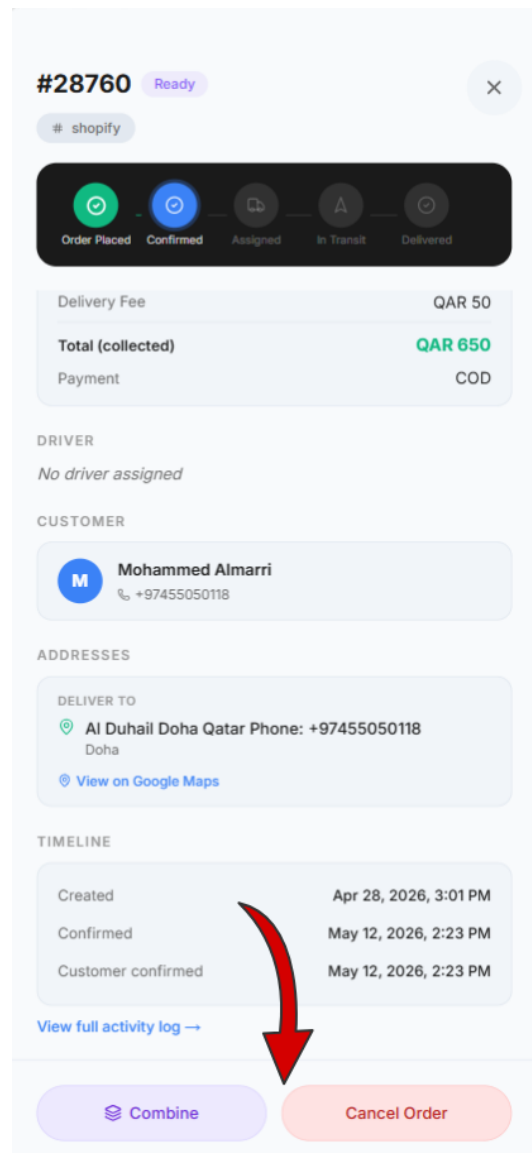

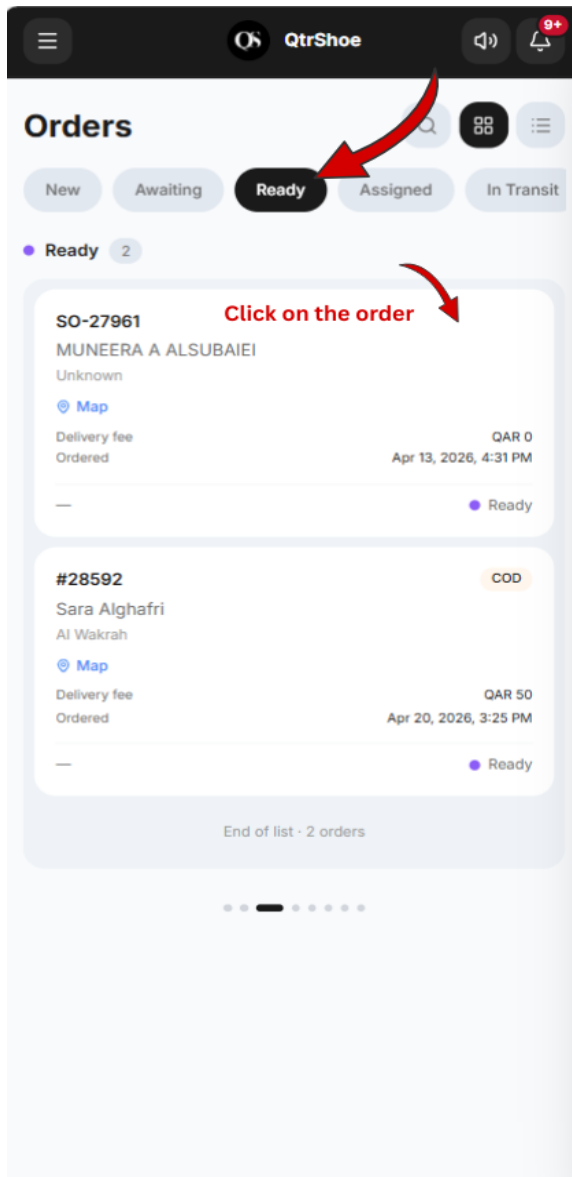

Ready

Orders prepared and ready for driver assignment.

Available actions:

- Combine
- Cancel Order

Assigned

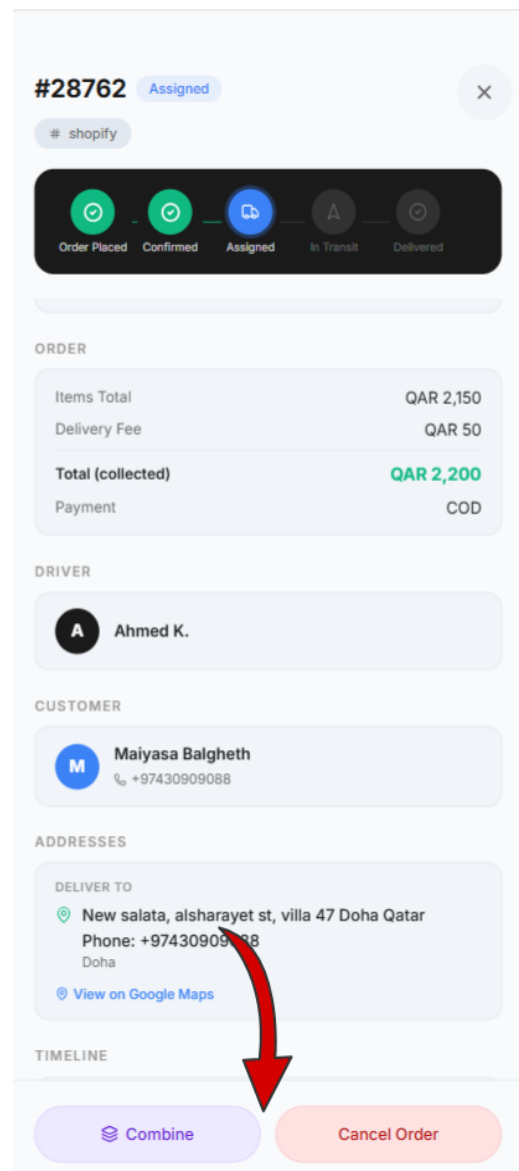

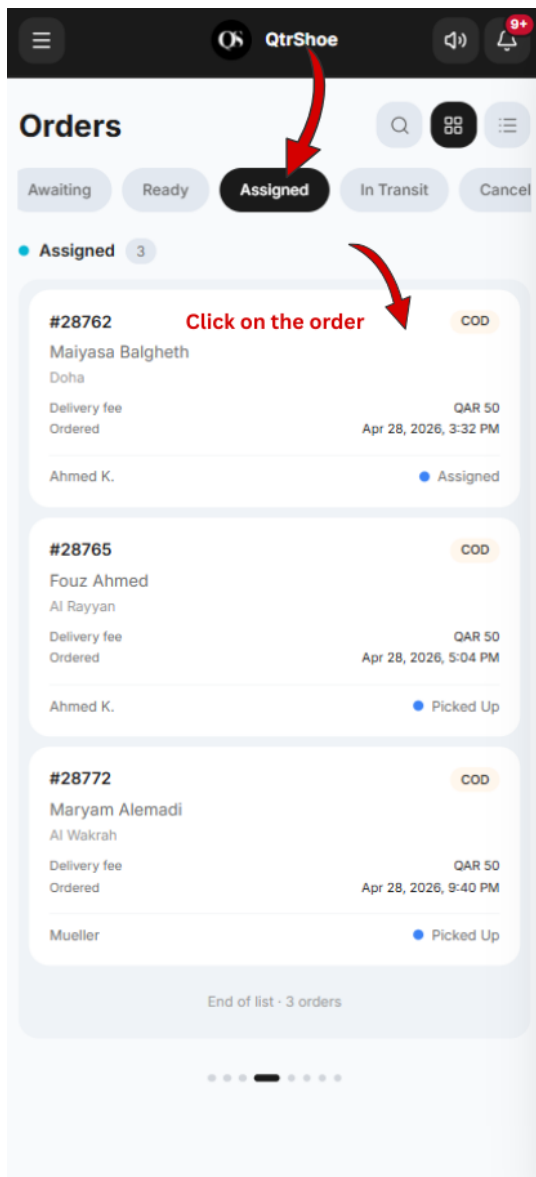

Orders assigned to a driver.

Displays:

- Driver information
- Order details

Available action:

- Cancel Order
- Combine

In Transit

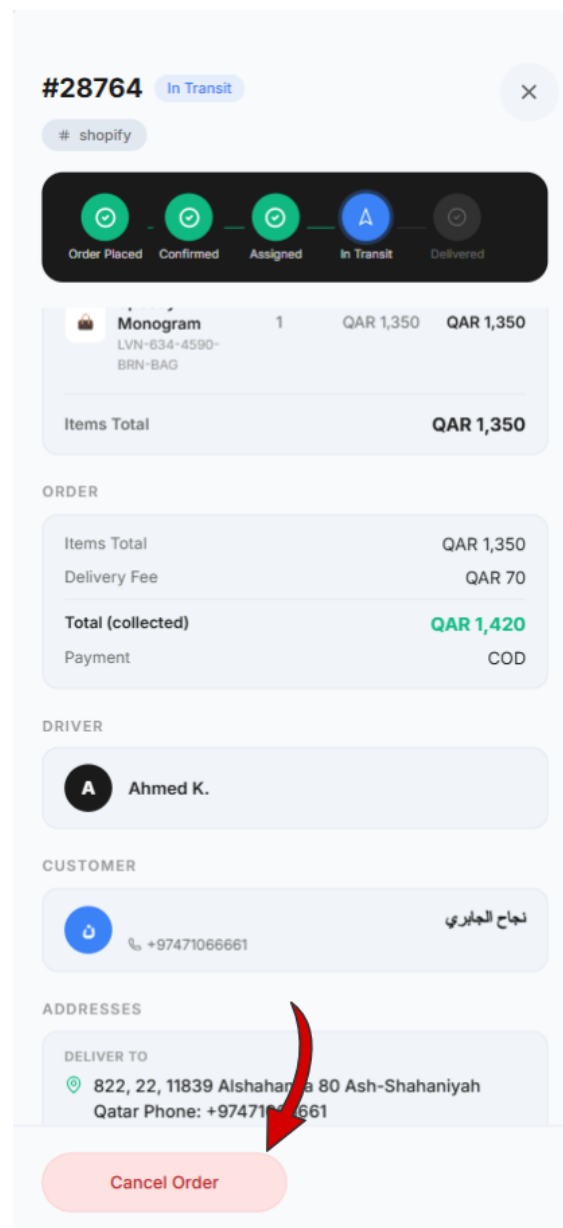

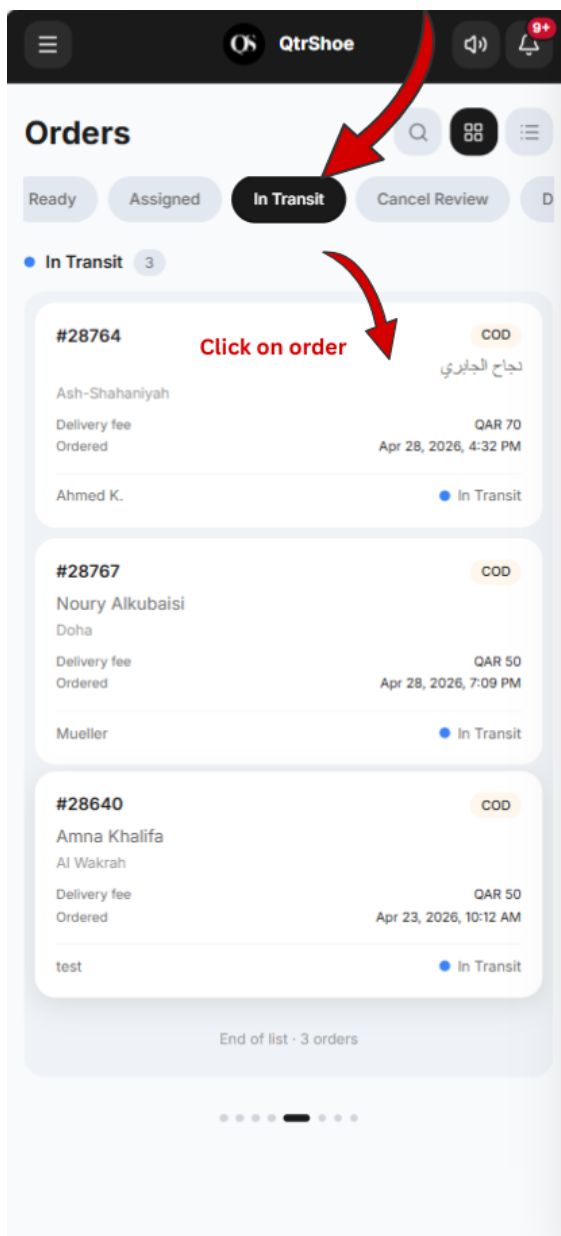

Orders currently being delivered.

Displays:

- Driver information
- Order details

Available action:

- Cancel Order

Cancel Review

Displays cancellation requests submitted by drivers.

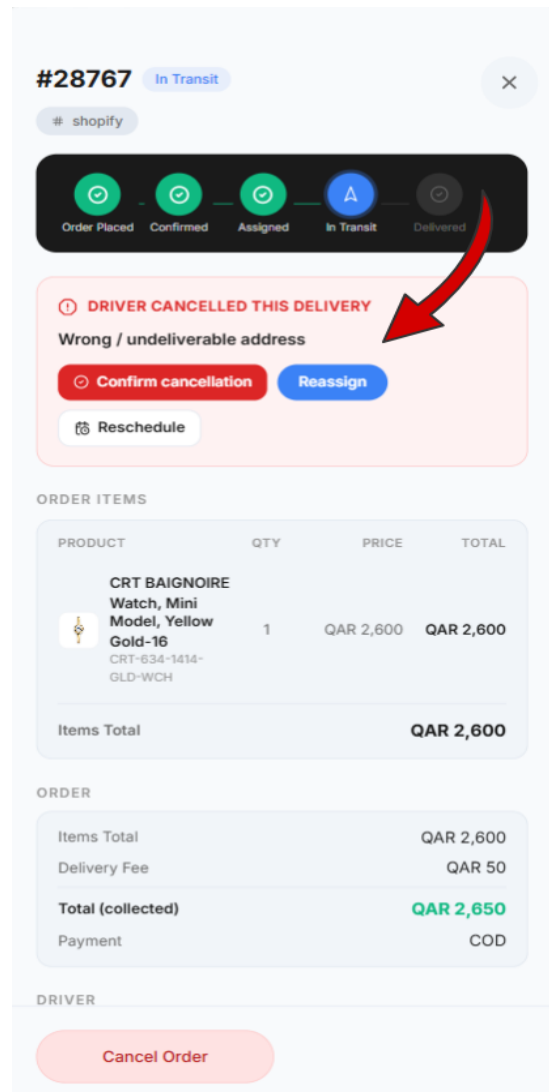

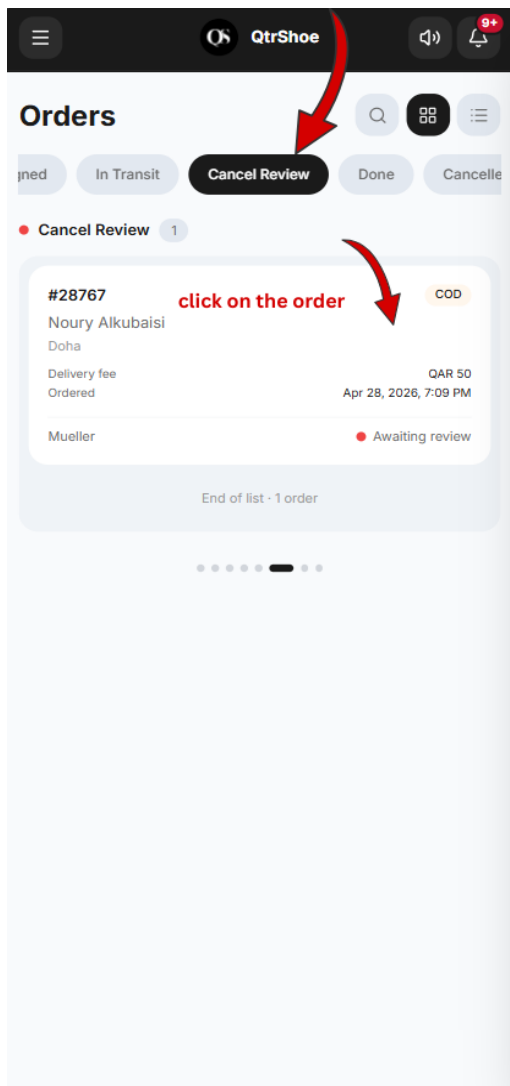

Shows:

- Driver cancellation reason (e.g., customer phone unreachable, customer not at location, wrong address)

Available actions:

- Confirm Cancellation: Cancels the order
- Reassign: Assigns another driver
- Reschedule: Schedules delivery later

note: Contact the customer before deciding whenever possible.

Done

Completed deliveries.

Available action:

- Initiate Return: Used when the customer requests a return
 1. Select returned products
 2. Enter return reason
 3. Submit return request

Actions

Confirm receipt

Case 3: Delivery Rejections

Items the customer refused during delivery. These remain visible until physically returned.

- Manager confirms receipt when received.

The screenshot shows the QtrShoe app interface. At the top, there's a header with a menu icon, the QtrShoe logo, and notification icons. Below the header, a status bar indicates "#SO-27946 · Jawaher Hamad" with a "Delivered to Store" label and a link to "open the return to confirm receipt".

The main section displays "Ahmed K." with "0 rejected items · 4 active return pickups". Below this, a section titled "IN TRANSIT (FORMAL RETURNS)" lists several items with their status: "#28722 · Zaid QTR · 1 unit · Out for Pickup", "#SO-27946 · Jawaher Hamad · 1 unit · Delivered to Store", "#28695 · SHAIKHA ALRUMAIHI · 1 unit · Delivered to Store", and "#SO-27945 · Tarfa Alkuwari · 1 unit · Delivered to Store".

A red circle highlights the name "Mueller" in the next section, which shows "3 rejected items · 4 active return pickups". Below this, three items are listed with checkboxes and icons:

- ☒ GYD Saint-Sulpice Card Wallet Brown qty 1
##28771 · haya alnoobi · Doha · delivered 5/11/2026
- ☒ GYD Bohème Hobo Bag-Black qty 1
##28771 · haya alnoobi · Doha · delivered 5/11/2026
- ☒ GYD Rouette Structuré PM Bag-Navy blue qty 1
##28771 · haya alnoobi · Doha · delivered 5/11/2026

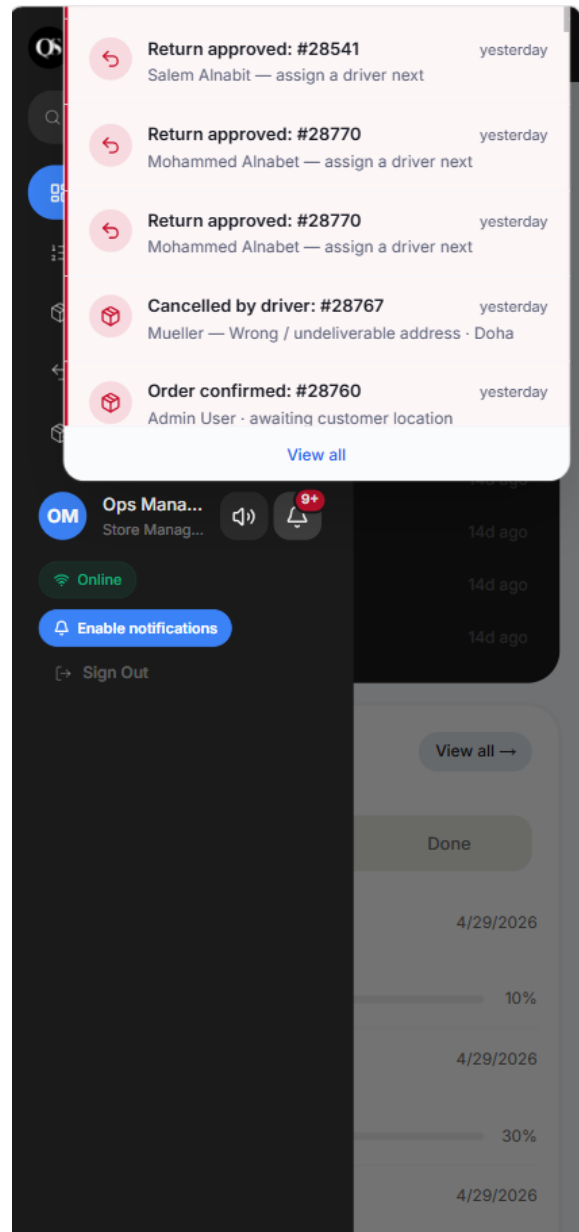

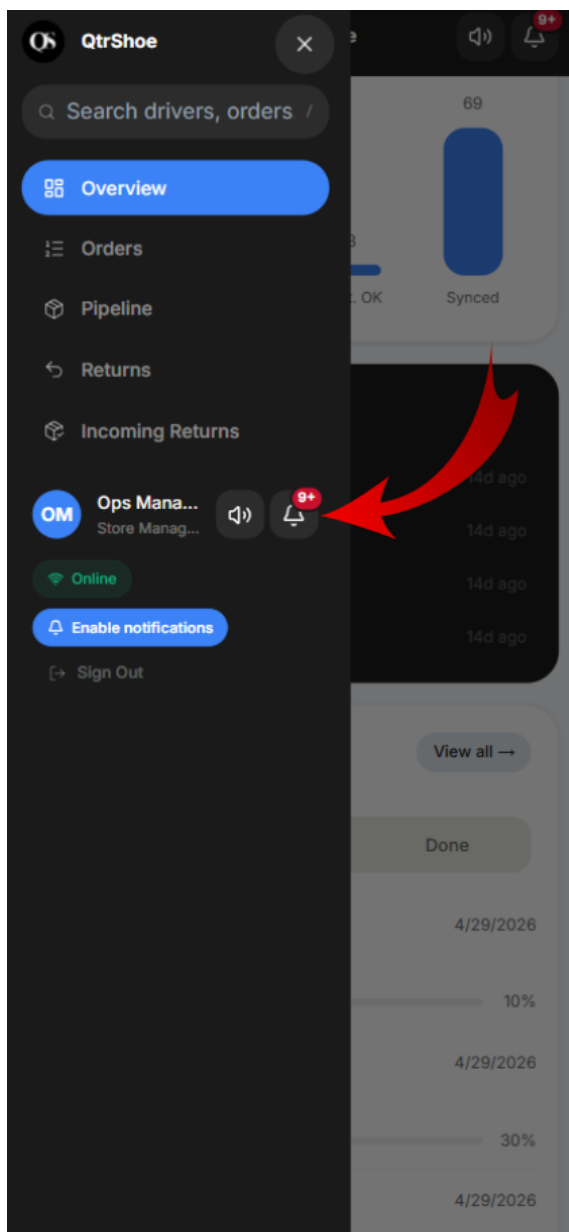

Below the items, there's a note field: "Note (optional, applies to all selected)" with a text input area containing "Condition, location, any other info for the audit log". A red arrow points from the "Confirm receipt of 3 items" button to this note field.

At the bottom, another "IN TRANSIT (FORMAL RETURNS)" section lists more items: "#28787 · Sara AlMulla · 1 unit · Delivered to Store", "#28778 · N Alq · 1 unit · Delivered to Store", "#28785 · Bushra Alghamdi · 1 unit · Delivered to Store", and "#28784 · Dana Alabdulla · 1 unit · Delivered to Store".

6. Notifications

Store Managers receive real-time operational alerts, such as:

- Delivery Started (driver has started delivery)
- Picked Up (driver confirmed pickup)
- Return Request Submitted (customer submitted return request)
- Exchange Notification (exchange request created)
- Orders Combined Notice (orders merged)
- Return Out for Pickup (return pickup initiated)
- Return Complete (return fully completed)

7. Customer Messaging Automation

The system automatically sends customer notifications at key stages.

Awaiting Stage

Location Confirmation Request

Sent when awaiting customer confirmation.

24-Hour Reminder

Warns the customer that the order will be cancelled if not confirmed.

Delivery Started

Customer receives:

- Out for Delivery

Delivery Completed

Customer receives:

- Invoice Delivery (invoice confirmation)
- Return Request Form (allows return submission)

Return Submitted

Customer receives:

- Return Acknowledged

Return Decision

Customer receives one of:

- Return Approved
- Return Rejected

Approved Return

Customer receives:

- Return Out for Pickup
- Return Completed

8. Best Practices

Store Managers should:

- Review new orders promptly
- Monitor stuck orders regularly
- Contact customers before cancellation decisions
- Confirm physical returns immediately upon receipt
- Review cancel requests carefully before confirming
